

Fleetcare Repair Management

Why use Millar Fleetcare Repair Management?

Fleetcare repair management assists in a low cost and efficient way to repair customer assets.

About Millar Fleetcare Repair Management

We have a nationwide network of approved repairers that cover a full range of repairs.

Our approved repairers are selected for their location and facilities together with their skills level, ability, capability and standard of work. At Millar we require that our network repairers provide a fast turn around and high quality of work at an appropriate cost – particularly important when several vehicles are being returned together at end of lease.

To avoid extended delays Millar would manage larger batches by using more than one repairer.

We can arrange collection and delivery for any assets at any time.

All repair documents, photos and delivery notes will be added to our website and secure log in will be issues for customer viewing.

To enquire please contact Millar on 01279 876 888 or email millaruk@aol.com
